## Overview

The **CRA *Wiz* and Fair Lending *Wiz* 7.2SP1 Hotfix (Build 72.11.25)** includes updates for the HMDA DF regulation, Proxy Updates, and bug fixes.

It can be installed as an upgrade to Version 7.2SP1, but please note that it is **optional** to install since the hotfix will be included in the Version 7.3 release scheduled for later this year.

## Who should install

This update is **optional** for institutions using CRA *Wiz* and Fair Lending *Wiz* Version 7.2 SP1.

## Where to install

This hotfix updates the build number so it needs to be installed on both the SQL Server and Client machine(s).

## Prerequisites

**CRA *Wiz* and Fair Lending *Wiz* 7.2 SP1** is required to install this update.

## Required permissions

This installation requires writing and modification, SQL server access, and registry modifications. Wolters Kluwer recommends that the user running the install have both Windows admin and SQL Server admin login credentials.

## Required free disk space

15GB

## Approximate install time

25 minutes

## Installation

To begin installation of the **CRA Wiz and Fair Lending Wiz 7.2 SP1 Hotfix**, follow these steps:

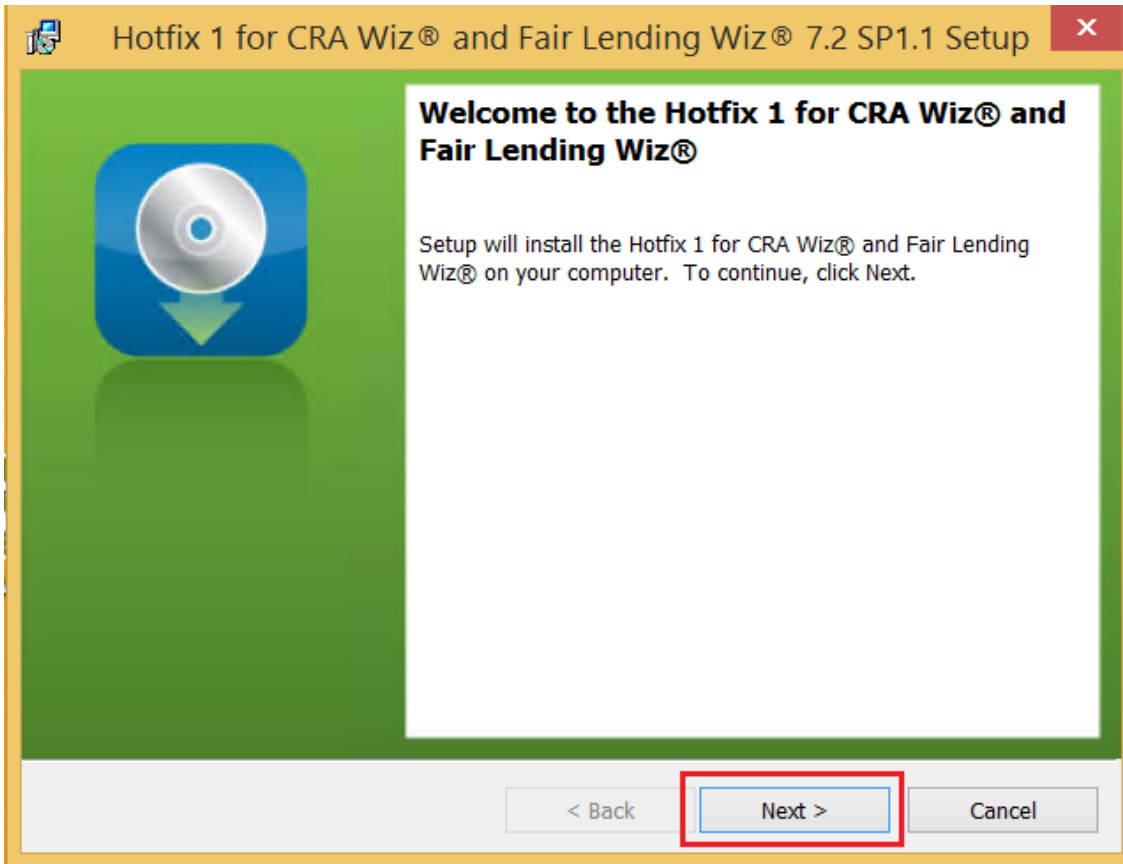

1. Download the Hotfix locally on the client or the SQL Server where you are performing the upgrade.
2. Double-click the **CRAWiz72SP1Hotfix1.exe** file and choose **Run as Administrator**.

The installer displays the **Welcome** screen.

3. Follow the directions for each of the following screens.

## Welcome Screen

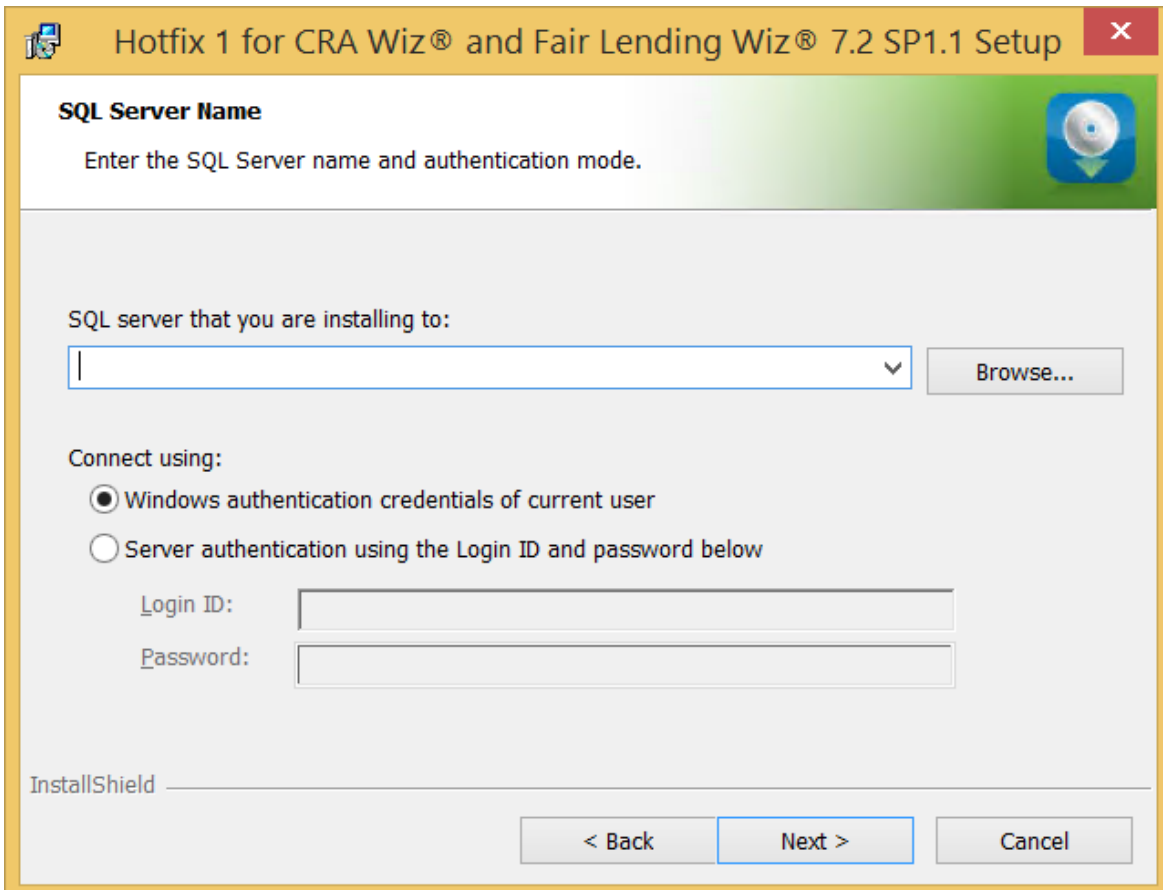

Click the **Next** button:

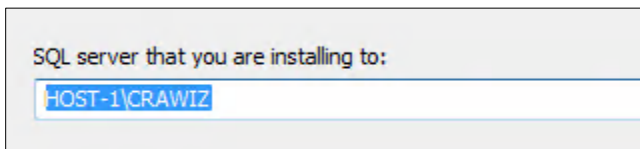

The software displays the **SQL Server Name** screen.

## SQL Server Name Screen

You use the **SQL Server Name** screen to enter SQL Server and authentication information for the SQL Server running CRA Wiz and Fair Lending Wiz:

1. In the **SQL server that you are installing to:** field, do one of the following:
  - Enter the name of the SQL Server to which you are installing the data:

- Click the drop-down arrow located at the end of the field to select the Database server from a menu list:

- Click the **Browse** button:

Then select the database server from the resultant dialog box:

2. Choose one of the following authentication options:

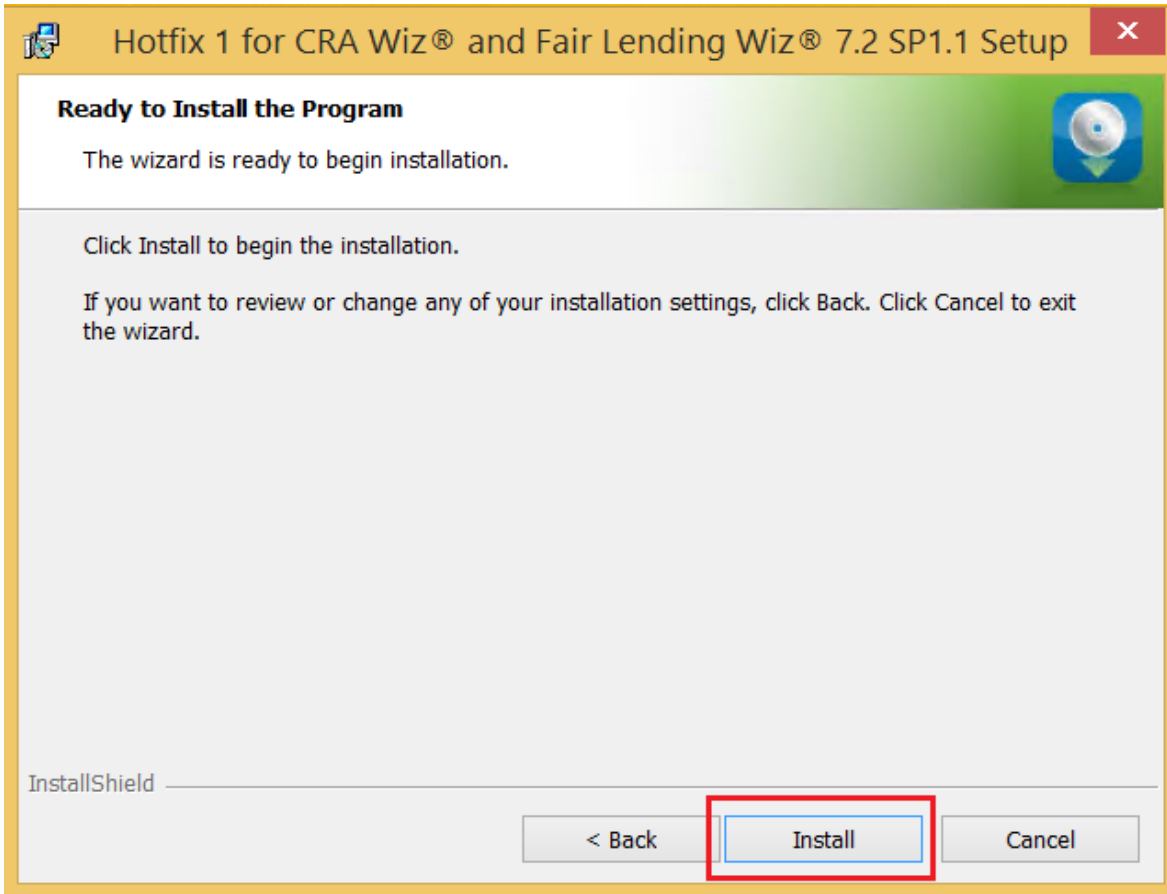

- **Use Windows Authentication credentials of current user**
- **Use SQL Server Authentication using the Login ID and password below** - If you select this option, you must also enter your SQL Server account User Name and Password in the **User Name** and **Password** fields.

3. Click the **Next** button.

The software displays the **Ready to Install** screen.

## Ready to Install the Program Screen

You use the **Ready to Install** screen to begin the installation:

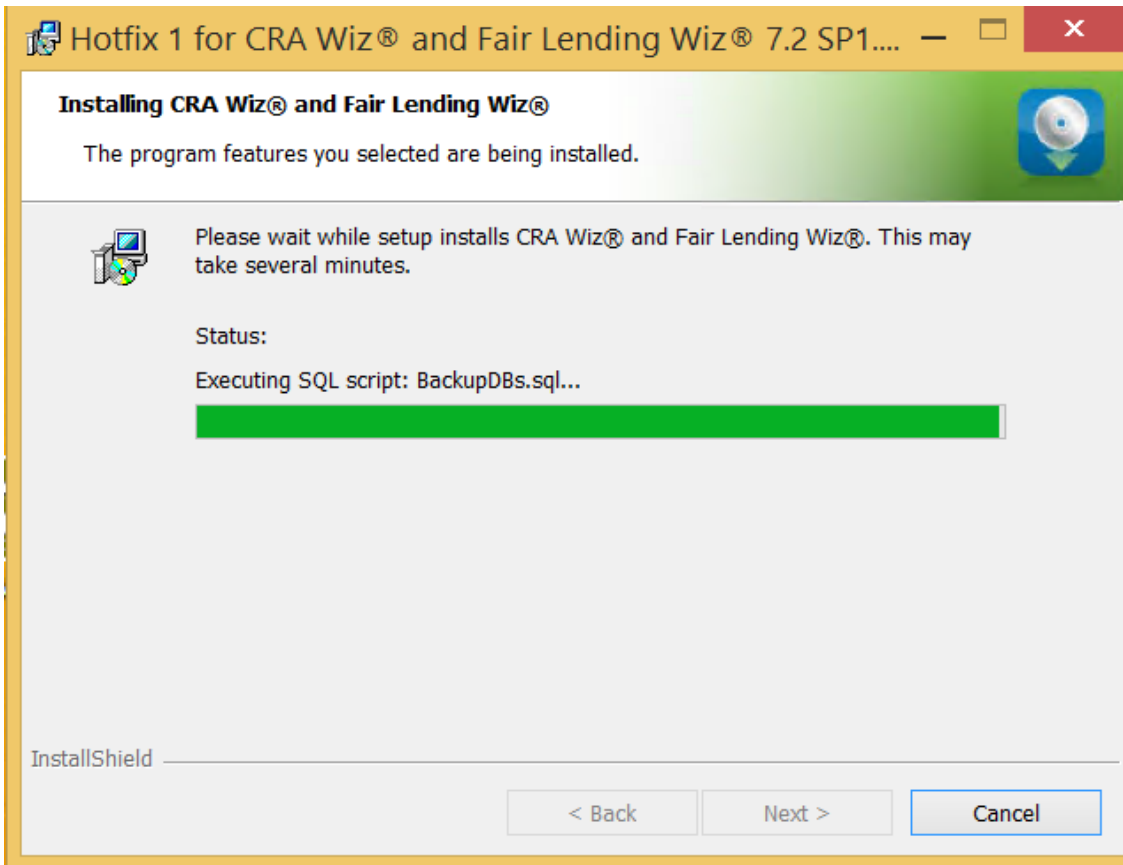

Click the **Install** button.

The installer displays the **Setup Status** screen.

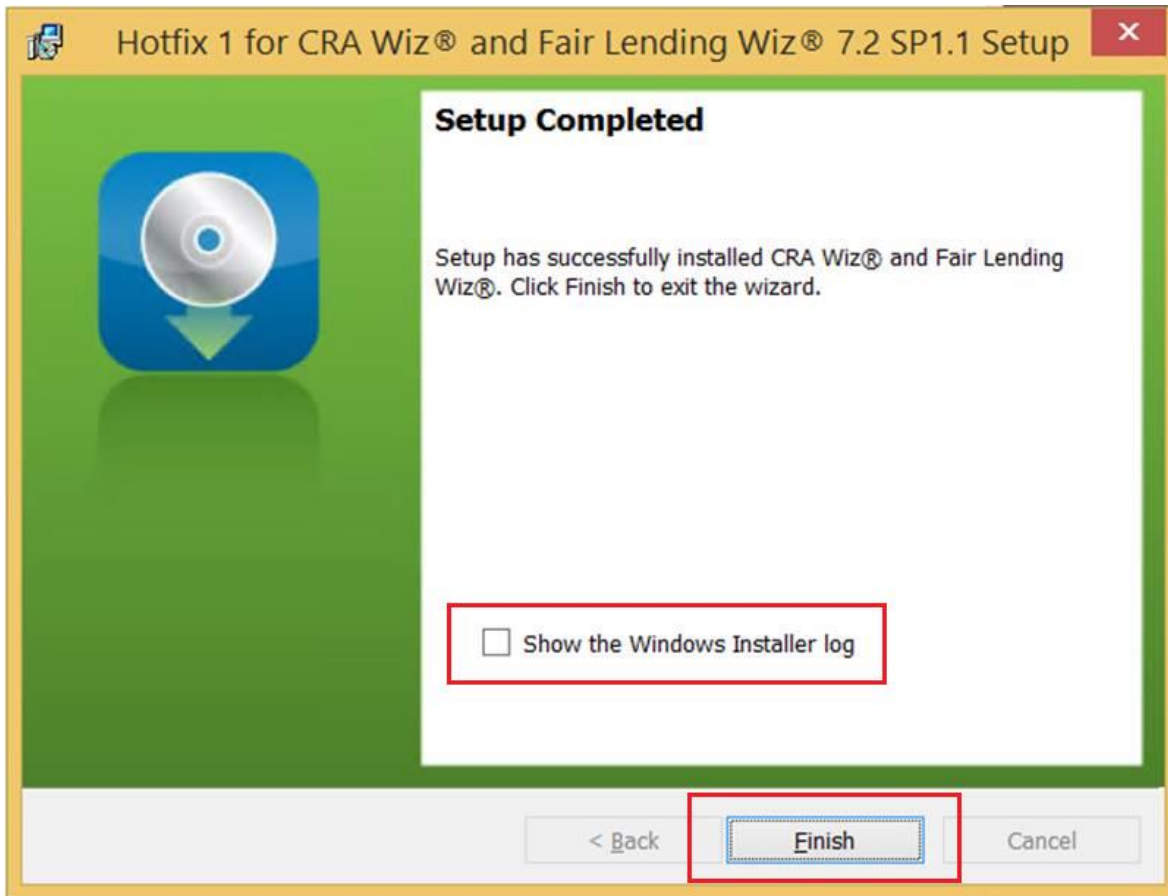

## Setup Status Screen

The **Setup Status** screen displays a progress bar that reports the progress of the installation:

When the installation is complete, the installer displays the **Setup Complete** screen.

## Setup Complete Screen

**Note:**

To view a Windows log of the installation process, click the **Show the Windows Installer log** checkbox. When you exit the installer, Windows displays the log.

Click the **Finish** button.

Installation is complete.

**IMPORTANT:** To confirm installation of the 7.2sp1 Hotfix, refer to the following section, [Confirming Installation](#).

## Confirming installation

To confirm installation of the 7.2sp1 Hotfix, go to Help – About CRA Wiz within the application and confirm the build numbers have been updated to 72.11.25 as shown in the screenshot below.

If you do not have access to a CRA Wiz client application below is a SQL Query that can be run to confirm the back-end version has been updated to 72.11.25.

```
use objectstore
select value from dbo.properties
where property='back-end version'
```
